

TOWN HALL NEWS

TOWN OF COUPEVILLE

VOL XVII, Issue 3

June 2014

WHO TO CONTACT AT TOWN HALL • 678.4461 • www.townofcoupeville.org

Nancy Conard, Mayor
mayor@townofcoupeville.org
General questions, community issues

Bridget Smith, Town Planner
planner@townofcoupeville.org
Questions about land use, design review, building permits

Rick Norrie, Town Marshal
paulone@townofcoupeville.org
Questions about law enforcement issues

Nanc Garner, Utility Clerk
utilityclerk@townofcoupeville.org
Questions about utility bills

Kelly Beech, Clerk Treasurer
clerktreasurer@townofcoupeville.org
Questions about meetings, budget and finance, public records

SUMMER WATER RATES IN PLACE

Coupeville, like other utility systems in the State, is required to encourage conservation of water use. To accomplish this, the water rates are increased in the summer, to discourage too much of an increase in water use for landscaping purposes. (Water rates are calculated to generate sufficient revenue to operate the system. If rates were at the same level all year, the winter rate would have to be increased to ensure the same amount of revenue is generated in a year.)

Our highest demand for water use is on hot summer days. We are required to build and maintain a system as if the peak day of water use happened 365 days a year. So, when you conserve water, you also help to keep rates down.

WATER EFFICIENCY OUTDOORS

Most Coupeville residents enjoy green grass during the spring and fall months when rain keeps it watered, and allow their grass to go dry during the summer.

If you water plants, there are a few things you can do to maximize benefit to the plants and minimize use of water:

- Water in the evening or during early morning hours when evaporation is least likely to occur. Drip irrigation maybe used during the day with minimal loss due to evaporation, and helps deliver water directly to the plant.
- Consider water consumption when selecting plants. Some plants use more water than others. Consult a good gardening book to determine low water-using and drought tolerant plants. WSU Master Gardeners are a great resource for such information, and are often at the Farmer's Market and other public events.
- Use mulches to help planting beds retain moisture.

GARDEN PLOTS AVAILABLE

We still have a few plots available in the Community Garden. The 10' x 12' plots include access to water. If you are interested, please contact Town Hall.

WATER EFFICIENCY INDOORS

The Town offers free faucet aerators for bathrooms and kitchens, shower flow restrictors and toilet leak detection kits to all of our water customers. Stop by town hall and ask for them.

Typical bathroom faucet aerators are 2.2 gallon per minute (GPM), so replacing them with a .5 GPM aerator can reduce your water usage at that source by 77%. Typical kitchen aerators are 2.2 GPM so replacing them with a 1.5 GPM aerator can reduce your water usage at the sink by 32%. Shower flow restrictors can reduce flow by 40%.

ANNUAL WATER QUALITY REPORT

Each year the Town prepares an Annual Water Quality Report. This report conforms to a federal regulation requiring water utilities to provide water quality information to customers each year.

Your drinking water is highly regulated by Washington State Department of Health (DOH) and US Environmental Protection Agency (EPA). We test for bacteria, asbestos, lead and copper and inorganic compounds. None of the tests reveal any risk to public health.

This year the report is being posted on the Town's website, at www.townofcoupeville.org. You may read the entire report there, and print your own copy. If you would like to request a printed copy, please contact Town Hall at 678-4461, extension 0. We will mail a copy of the complete report to you.

If you have any questions regarding the report, please contact William LaRue, Public Works Director, 360-914-0314 or utilites1@townofcoupeville.org
